# YOUR PARTNER IN EUROPE FOR BIOTECH AND HUMAN HEALTH!

bioXclusters  
European Innovation Worldwide

This initiative is supported by the European Commission's Directorate-General for Enterprise and Industry and financed under the Competitiveness and Innovation Framework Programme (CIP).

# YOUR PARTNER IN EUROPE FOR BIOTECH AND HUMAN HEALTH!

**bioXclusters** is a project supported by the **European Union** that unites four leading **biotechnology** and **health care** clusters with the objective of fostering the **internationalisation** of the wide and innovative network of **Small and Medium Enterprises (SMEs)** in the participating regions.

Bavaria (Germany), Catalonia (Spain), Piedmont (Italy) and Rhône-Alpes (France) join their **knowledge**, **skills**, **best practices** and **dynamic companies** in life sciences, with a focus on drug development, healthcare and medical technology. Together, we are a strong and multifaceted partner for other regions of the world.

The project also benefits from the know-how and the long-standing experience of the ERAI agency (Entreprise Rhône-Alpes International), who is the key enforcer of the Rhône-Alpes region for its international economic development.

The **bioXclusters** regions bring together more than 1700 companies developing their activity mainly in the fields of **oncology, personalised medicine, cardiovascular, neurological, infectious, inflammatory and autoimmune diseases**. Each region also brings its own specialties to the consortium.

Our companies work with innovative approaches in cutting-edge scientific research projects, maintaining a **dynamic environment** for facing the current market and patients' needs.

The project focus will be on the **USA, Brazil and China**, with the aim of expanding to other partner countries in the long run.

**bioXclusters** is the biotechnology and human health project that offers you the opportunity of establishing partnerships with a wide network of SMEs in Europe!
