

Dear Sirs,

We would like to invite you to participate in the special **Technology Transfer Zone** during the 6th **Central European Congress of Life Sciences Eurobiotech**, which will take place on **11-14 September 2017** at the International Exhibition and Congress Center EXPO Krakow.

The Technology Transfer Zone will be integral part of the accompanying exhibition of biotechnology companies. Our aim is to present the scientific projects applied for commercialization and to demonstrate practical solutions and options for effective cooperation between science and business.

To participate in the Technology Transfer Zone we invite:

- technology transfer centers and technology parks
- incubators
- clusters
- other institutions promoting cooperation between science and industry

The added value?

In addition to the stand in the accompanying exhibition, the exhibitors will have:

- possibility to give a 10-minute presentation/speech during "How to make money on science?" session addressed to the industry representatives;
- possibility to present offer to the scientific community (participants of the congress) during Tuesday's poster session.

Do you want to become part of technology transfer zone? Contact Us:

31-586 Kraków

9 Galicyjska Str.

How to make money on science? - satellite session (Monday 11th, 12.30-14.00)

Session is organized by LifeScience Kraków Cluster and moderated by Kazimierz Murzyn, its Managing Director.

One of the main purposes of the session is to help achieve direct networking between science and business sectors by presenting various models of technology transfer and by presenting the offer of Technology Transfer Centers - some of them will directly represent the scientific institutions participating in the Congress.

The session is addressed mainly to companies and entrepreneurs from the following industries: pharmaceutical, medical, cosmetic, agricultural, food, biotechnological, ecological and bioenergetic.

The session program will include:

- Keynote: lecture of an expert in technology transfer in the field of life science and biotechnology
- Presentations of the exhibitors of the Technology Transfer Zone
- Panel discussion: "How to make money on science?"

How to make money on science? - poster session (Tuesday, 12th: 9.30 – 11:00)

Poster session of the Eurobiotech Congress will be animated by LifeScience Cluster Kraków. Session will consist of short presentations at the stands in the Technology Transfer Zone, addressed to the all Congress participants. Presentations will be held in the form of a poster session, carried out in accordance with the schedule. All participants in the Congress will receive information and invitation to participate in this session.
