

# Paediatric Neurorehabilitation Technology Showcase

Do you have a technology for paediatric neurorehabilitation?  
Come and tell us all about it on Tuesday 17<sup>th</sup> October 2017, London

Day chaired by NIHR Brain Injury Brain HTC Paediatric Lead, Professor Topun Austin and supported by Clinical Lead, Dr Anna Maw

The **Brain Injury Technologies Think (BITT) tank** series invites SMEs, start-ups and project teams to showcase their technologies to a panel of patients, carers, industry, clinical and academic experts. This open event aims to explore potential collaborations, mixing skills and expertise to deliver novel technological solutions for the brain injury patient pathway.

**INVITATION**  
We are now inviting expressions of interest from SMEs, start-ups and project teams to take part in our technology showcase! Please contact us on [info@brainhtc.org](mailto:info@brainhtc.org)

**WHY SHOULD I ATTEND?**

- As a technologist/start-up: networking with the right organisations to further your business and commercialisation opportunities.
- As a clinician/researcher: explore potential collaborations between industry, academics and clinicians to support the development of new medical devices.
- As a member of the public: develop networks and informally engage with innovators in the development of relevant products.

**BOOKING IS ESSENTIAL**

Book a free ticket on Eventbrite:
